

Hello Francis

The broadcast for Ms Uganda at Sheraton was successful.

We DELIVERED AN HD SIGNAL IN THE FORMAT OF 1080i 50.

The return video was flowing very well but the Startimes stream was freezing.

This was resolved by increasing the power and I suspect the Earth satellite receiver dish could have lost proper alignment.

The satellite booking time was from 5 pm on 03/7/2024 to midnight but we added one hour as the function ended late -the next day 01:00hrs 4/7/2024.

No Other issues were accrued until the close of the broadcast.
